

Fire and Emergency Lighting Systems

# Emergency Lighting

Goldshield more than just peace of mind.

Emergency lighting reduces the potential dangers that occur with the loss of mains electricity and the failure of normal lighting – by automatically providing illumination, of a sufficiently high level, to allow safe evacuation of the building.

**Goldshield** specialises in the design, installation and maintenance of emergency lighting solutions to a wide range of industry and has built up an excellent reputation for its' consistent delivery of high quality emergency lighting systems.

**Most emergency lighting schemes fall into one of the following categories:**

**Maintained**

The emergency light units are illuminated at all times, using the same lamps for both normal and emergency operation. This lighting would normally be on a dedicated circuit with a central isolation and test facility.

Monthly, quarterly and yearly servicing and testing are an essential part of the installed system. None are more important than the yearly discharge test of the standby battery power.

Our engineers will ensure that your system – and your building occupants – are looked after in a safe manner, recording all details on each visit.

**Non-maintained**

The emergency light units only illuminate in the event of a mains failure. This lighting would be from independent lighting circuits with a means of isolation and test points.

Goldshield only specifies products which are designed and manufactured to meet the exacting requirements of this industry.

**A member of the NICEIC** – the electrical contracting industry's independent voluntary body for electrical installation, in the UK.

All our products meet the British Standard for emergency lighting – BS 5266: Part 1 and European Standard EN1838.

In addition to the British Standards, there are other legal requirements to consider, including The Building Regulations 2000 and the Fire Precautions (Workplace) Regulations 1997.

**Goldshield** delivers emergency lighting solutions that best meet your needs and is committed to providing customers with a cost effective, highly efficient system together with first class customer service.

For more information on emergency lighting systems call us on **0191 268 5000** or **0131 443 9633**. Alternatively email [enquiries@goldshieldltd.co.uk](mailto:enquiries@goldshieldltd.co.uk)
