

Social Alarms

Nurse Call

Goldshield more than just peace of mind.

The significant growth in the social alarms sector – which includes warden call, telecare, dispersed alarms and nurse call systems – can be directly attributed to the rapid growth in the UK's ageing population.

User friendly

Easy to install (Ideal choice for system upgrades)

Easy to maintain

Simple integration with many staff attack systems for EMI & mental health clients

1 year warranty

24 hour emergency cover

Goldshield is a market leader in the design and installation of social alarm systems, with over 20 years experience in the sector.

Our nurse call systems are designed specifically to protect the welfare of care home residents and to offer the highest standards of proactive personal care. Nurse call systems allow staff and patients to feel safe in the knowledge that should help be required, assistance can be directed to a specific room, at the touch of a button.

Nurse call systems are designed to work on a simple electronic network and provide features which are easy to install and cost-effective to operate.

Patients and staff can initiate calls from a range of nurse call points, on a number of levels:

- Patient-to-nurse
- Nurse-to-nurse
- Crash alarm
- Staff attack

The room identity is then displayed on the indicator panels at the nurse base stations and/or sent to radio pagers for staff who are on the move.

Staff can register their presence in a room, allowing other staff members to locate them and staff can also log their attendance or visit to a room, when carrying out regular checks.

Specified by over 150 UK NHS Trusts and healthboards, as well as doctors' surgeries, schools, social services and housing departments, these systems provide peace of mind for staff, patients and their families.

Nurse call systems are designed to give staff the flexibility to remotely activate an alarm and feel more secure, knowing they can summon assistance at the touch of a button.

Network II
Nurse call system.

Product features:

- Addressable system with 20 character room descriptions
- Large 15mm high character display units
- All indicator panel settings can be independently altered to suit the users' requirements
- Data logging via PC or printer
- 'Visit' feature allows staff to log attendance
- Integration with the Red Alert staff attack system
- A range of telecare products are available to enhance the system
- Radio paging option for notifying mobile staff of a call for assistance
- Monitoring of fire exits and controlled drugs cabinets
- Pendants available for residents to remotely call for assistance
- Ideal choice for upgrading systems – re-using existing cabling
- Large capacity control unit allows for future expansion without expensive upgrades

Indicator Panel
with large text display

Door Monitor
Generates an alarm call if door is breached.

Push-to-call lead
Designed to plug into the nurse call units.

At **Goldshield**, we take great care to ensure the standard of the installation we put our name to, is of the highest level. Our management team are on hand to review the progress of the installation and at the point of handover to the customer.
