

Social Alarms

Telecare Peripherals

Goldshield more than just peace of mind.

The significant growth in the social alarms sector – which includes warden call, telecare, dispersed alarms and nurse call systems – can be directly attributed to the rapid growth in the UK's ageing population.

Increased protection – immediate response as well as potential to prevent incidents

Peace of mind – users feel more secure, relatives are reassured and the carers and management team have the peace of mind that comes from knowing your clients are well looked after

More efficient – use of staff resources and reduced level of manual checking

Better quality of care – reduced level of manual checks means less disruption to residents and a greater degree of independence and quality of life

Simple to install, easy to maintain – which means minimal disruption to clients and staff

Guaranteed performance – automated integral battery monitoring for guaranteed performance

24/7 support – 365 days a year servicing and support available

Goldshield is a market leader in the design and installation of social alarm systems, with over 20 years experience in the sector.

Social alarms – which encompass telecare and telehealth products – provide effective care and support for a generation of people who are living longer and wish to remain independent in their own homes.

Social alarms in general, provide a greater degree of independence and peace of mind for elderly and vulnerable people living in their own homes. Falls and injuries are a major concern for the elderly in particular. The consequences can be serious and distressing so it is important to establish a social alarm system which ensures that help is always at hand, 24/7, 365 days a year – with the push of a button.

Ranging from a basic community alarm service that is able to initiate an emergency call via a pendant to an integrated system that includes detectors or monitors (i.e. motion, falls, fire and gas) that trigger a warning to a response centre. These systems provide peace of mind to users and their families and reduce the burden on health and social care resources.

Our range of telecare and telehealth products are reliable, simple and easy to install, energy efficient and user friendly. They cover areas such as:

- Personal safety
- Environmental
- Telehealth
- Dementia & wellbeing

– and provide immediate solutions which allow for the level of care to be extended or reduced as the needs of your clients change.

Telecare Peripherals

Personal Pendant

Used to make an alarm call by simply pressing the red button.

Flood Detector

Used anywhere there is a potential flood risk.

Pulse Oximeter Sensor

Pulse, blood, oxygen levels can be monitored without the need for a healthcare visit.

Entry/Exit Alarm

Armed door entry alarm to detect unauthorised movement.

Product features:

- Easy to install with plug in and play technology providing device type and location
- Fully compatible with Advent xt, Altec Response and SayPhone range of social alarm products
- True preventative real time technology on personal and wellbeing devices
- All devices operate on the new European 169MHz social alarms frequency
- All integral batteries are monitored for low status with automated trigger to social alarm device
- Compatible with Alarm Receiving Centres using BS 8521 and other established industry standard protocols
- Integration with other assisted living solutions such as gas shut off valves

BS 8521 Protocol

BS 8521 offers for the first time the promise of improved interoperability of remote controllers supplied by different manufacturers, better identification and localisation of alarms and events and a solution which is resilient in the telecommunications network environment post 2010.

At **Goldshield**, we take great care to ensure the standard of the installation we put our name to, is of the highest level. Our management team are on hand to review the progress of the installation and at the point of handover to the customer.
