

Social Alarms

# Warden Call

Goldshield more than just peace of mind.

The significant growth in the social alarms sector – which includes warden call, telecare, dispersed alarms and nurse call systems – can be directly attributed to the rapid growth in the UK's ageing population.

**User friendly** and easy to operate

**Simple to install** – minimal disruption to residents and staff

**Fully compliant** – supports BS 8521 telecare protocol

**Future-proof** – compliant with BT 21CN network

**Fully covered** – 12 month warranty from the date of installation

**24/7 support** – 365 days a year, servicing and support available

**Goldshield** is a market leader in the design and installation of social alarm systems, with over 20 years experience in the sector.

These systems are designed to meet the needs of a generation who want to remain as independent as possible but, at the same time, achieve peace of mind through the knowledge that safeguards are in place to provide the level of care and support they may need.

The Advent xt warden call system, is one of the leading hard wired grouped systems on the market. Designed and manufactured in the UK, the Advent xt meets the demands of both the end user and organisations alike.

Compatible with all major UK Control Centres, the Advent xt utilises existing wiring – where necessary – and provides, as standard, a full telecare and telehealth facility.

All alarm call data is stored on a memory card inside the product and can be accessed locally or remotely from a standard PC or laptop, so that patterns in lifestyle can be spotted and care services can take a more proactive approach.

The Advent xt warden call system provides a cost-effective, long-term and future-proofed solution which meets your requirements and those of your clients.

## The Advent xt warden call

### Product Features

- Full telecare & telehealth compatibility as standard
- Ethernet port for telecare, telehealth and call history analysis
- The Advent xt's integral memory can store 12 months' system, alarm and activity data
- Advanced Digital Speech Processing (DSP) to give clear speech that can be set to suit the hearing needs of individual residents
- Full interconnectivity with other security systems such as fire and access control systems
- Message waiting facility allows care staff to leave important reminders for residents
- Flash memory card to back-up all system data and radio devices
- Privacy mode with timed override on alarm
- Fully monitored data with fault reporting
- Combined door entry option with call divert facility

Using the Altec device range – the Advent xt warden call system (with EN300 220-2 (2007) Class 1 receivers) offers full telehealth and telecare facilities, supported by the recently ratified and TSA endorsed BS 8521 protocol.

### BS 8521 Protocol

BS 8521 offers for the first time the promise of improved interoperability of remote controllers supplied by different manufacturers, better identification and localisation of alarms and events and a solution which is resilient in the telecommunications network environment post 2010.

At **Goldshield**, we take great care to ensure the standard of the installation we put our name to, is of the highest level. Our management team are on hand to review the progress of the installation and at the point of handover to the customer.
